Purchase

DH - All rooms

Thoughts for implementation:

- Printout spec for installation specialist
- See other rooms
- Connect sensor to camera
- Associate sensor with alarm, recording, or both
- "att…" Drag and drop components are only active if their respective room part has been added
- Name of the room can be renamed on the fly
- Ability to view all rooms at once
- Adjustable wall lengths
  - -walls in workspace
  - -walls added from room parts
- This level of the accordion can transition in when the user opts to set up room by room in "tell us about your home" or other, depending upon best fit
- User can see total for this room and total for all rooms
