Dear colleagues and friends,

It is our great honor to invite you to the 20th World Congress of the International Federation of Oto-Rhino-Laryngological Societies (IFOS), which will be held from June 1 to 5, 2013 at the COEX Convention and Exhibition Center in Seoul, Korea.

Under the active guide of the IFOS Program Advisory Committee, the comprehensive scientific program will follow the successful blueprint used in past IFOS World Congresses, while incorporating innovative new elements to provide a lively and compelling educational experience.

For those seeking to expand their knowledge of the field and learn about the most up-to-date advancements and discoveries, the IFOS Seoul 2013 cannot be missed. The Congress will also include special social and tour programs which will give you and your family a chance to experience our unique Asian culture and explore the beautiful and historic city of Seoul in addition to other parts of Korea.

Finally, a world-class exhibition will take place in COEX’s premier facilities where exhibitors from around the world will be able to display their new ENT products and services for all IFOS delegates. With tremendous support from the Korean Society of Otorhinolaryngology-Head and Neck Surgery (KORL) and the Korean Society of Otorhinolaryngologic Clinician (KOSOC), the organizing committee promises to deliver a dynamic and unmatched experience for all participants.

It is our sincerest hope that, as in past Congresses, IFOS Seoul 2013 will bring all of us together to share in the common goal of advancing and developing the field of Otorhinolaryngology-Head and Neck Surgery.

Cooperated with 11 ORL-HNS related Korean societies
Dear friends,

It is with great pleasure that I write to you, on behalf of the International Federation of Oto-Rhino-Laryngological Societies (IFOS), about the upcoming 20th World Congress which will be held from June 1 to 5, 2013 in Seoul, Korea.

There have been many recent exciting developments in the science of otorhinolaryngology and in patient care which we plan to examine and discuss at this crucial meeting. At our previous congresses, ENT professionals around the globe have enjoyed a stimulating scientific and social program. At this congress, we will take a critical look at new and existing clinical treatments.

The scientific program is designed to meet the aim of the 20th IFOS World Congress which is “Innovation and Integration in ORL-HNS”; it will consist of special and keynote lectures, round table and panel discussions, symposia, instructional courses and free paper sessions such as oral, e-poster and video presentations.

This 20th congress in the series should yet again prove to be an important milestone for clinical scientists and practicing health care workers from all disciplines of otorhinolaryngology. Together, we will further the management and treatment of patients and advance the field of otorhinolaryngology.

I really look forward to welcoming you to historic Seoul and to a very successful congress.

Paulo Pontes
President, IFOS

Greetings!

Back in 2009 in Sao Paulo, the International Federation of Oto-Rhino-Laryngological Societies (IFOS) General Assembly chose Seoul and the Korean Society of ORL-HNS to organize the World Congress in 2013. Their preparations have shown that this was an excellent decision.

The organizing committee, under the presidency of Chong Sun Kim, has already done a tremendous job preparing every detail of the biggest ORL event. Over 300 sessions covering nearly every aspect of ORL-HNS have been planned, with participation from over 1,000 international faculty members.

The World Congress is also a great chance to meet colleagues from every corner of the world, to share clinical experiences and developments and to enjoy the unique culture, cuisine and atmosphere of Korea.

It is a pleasure for me as General Secretary of IFOS to invite all of you to come to Seoul and participate in the world’s largest ORL event to increase its scientific and social value.

I hope to see you all in Seoul.

Milan Profant
General Secretary, IFOS
The International Federation of Oto-Rhino-Laryngological Societies (IFOS) is a non-political organization representing over 50,000 Otolaryngologists belonging to about 120 member nations.

IFOS was founded in 1965 and it has evolved to deal on a global basis with the problems of people with ORL disease by means of an active secretariat and committee structure; lobbying the World Health Organization; leading the global program for hearing loss prevention; providing interchange between centers, especially in Europe through the Twin Cities Project; publishing a newsletter and maintaining the interactive website. It has a continuing medical educational role and has developed a model undergraduate curricula; it has now initiated CME conferences between World Congresses and recently started the Worldwide Action "Hearing for All".

Half Day Programs

Half Day Tours include: Bus Transportation, English Speaking Guide, Admission Fees / Minimum Persons: 10

HT-1 Royal Relics Morning Tour [ Gyeongbokgung, National Folk Museum, Jogyesa ]
• Time & Dates: 09:00–12:30, June 1 (Sat), June 2 (Sun), June 3 (Mon), June 5 (Wed)
• Price: KRW 56,000 per person

This history-themed tour takes participants first to Gyeongbokgung (Palace), the grandest and most comprehensive of the five palaces of the Joseon Dynasty. First constructed in 1394 and reconstructed in 1867, the name Gyeongbokgung translates in English as “Palace Greatly Blessed by Heaven”. Participants will also have a chance to visit the National Folk Museum inside of the palace and will then visit Jogyesa (Temple), home to the administrative headquarters of the Jogye Order of Korean Buddhism.

HT-2 World Cultural Heritage Tour I [ Changdeokgung, Jongmyo Shrine, Insadong ]
• Time & Dates: 09:00–12:30, June 1 (Sat), June 2 (Sun), June 4 (Tue), June 5 (Wed)
• Price: KRW 56,000 per person

Changdeokgung (Palace) is one of the "Five Grand Palaces" built by the kings of the Joseon Dynasty. Changdeokgung, which literally means "Palace of Prospering Virtue", was the most favored palace of many princes of the Joseon Dynasty and retained many elements dating from the Three Kingdoms of Korea period that were not incorporated in the more contemporary Gyeongbokgung. Jongmyo Shrine was built by Lee Seong Gye, the first king and founding father of the Joseon Dynasty. It was a primary place of worship for kings throughout the Joseon Dynasty and is registered as a UNESCO World Cultural Heritage site for its well-preserved ancient customs such as memorial services and traditional music.

HT-3 Art & Culture Tour [ Namsangol Hanok Village, Leeum Samsung Museum of Art ]
• Time & Dates: 09:00–12:30, June 1 (Sat), June 2 (Sun), June 5 (Wed)
• Price: KRW 65,000 per person

Leeum, Samsung Museum of Art, exhibits traditional and modern works of art by Korean and international artists. The museum itself is just as fascinating as the works of art on display, since its three buildings were designed by the internationally renowned architects, Mario Botta, J ean Nouvel and Rem Koolhaas.

HT-4 Cultural Experience Tour I [ Experience a Traditional Tea Ceremony, Try on Hanbok (Traditional Korean Costume) & Manners Lesson, Folk Drawing on a Woodblock Print, Buchimgae Cooking (Korean Pancake) ]
• Time & Dates: 09:00–12:30, June 1 (Sat) – June 5 (Wed)
• Price: KRW 113,000 per person

For a long time in Korea, tea has been used to provide not just refreshment but also to dispel muddled thoughts and induce self-discipline for those that were studying or meditating. Participants will learn the etiquette of drinking tea through a traditional tea ceremony wearing Hanbok (Traditional Korean Costume). Folk paintings are comprised of “functional” pictures widely used by commoners during the late Joseon Dynasty to decorate their homes or to express their wishes for a long, happy life.
Full Day Tours include: Bus Transportation, English Speaking Guide, Admission Fees, Lunch / Minimum Persons: 10

HT-5  Cultural Experience Tour II [ Experience Making Traditional Masks, Bukchon Hanok Village ]
- Time & Dates: 08:30~13:00, June 1 (Sat) ~ June 5 (Wed)
- Price: KRW 100,000 per person

Participants will have a chance to make Korean masks which were used in war on both soldiers and their horses; ceremonially, for burial rites in jade and bronze and for shamanistic ceremonies to drive away evil spirits; to remember the faces of great historical figures in death masks; and in the arts, particularly in ritual dances, courtly, and theatrical plays. Bukchon Hanok Village, surrounded by Gyeongbokgung, Changdeokgung and Jongmyo Shrine, is home to hundreds of traditional houses called "Hanok" that date back to the Joseon Dynasty.

Full Day Programs

FT-1  DMZ (Demilitarized Zone), Hyeri Art Village
- Time & Dates: 08:00~16:30, June 1 (Sat), June 2 (Sun), June 4 (Tue), June 5 (Wed)
- DMZ Tour is not available on Mondays
- Price: KRW 110,000 per person

This trip to the last remaining relic of the Cold War includes a tour through the famed 3rd tunnel which was constructed by North Koreans to infiltrate the South. The 1,635 meters tunnel is 2 meters thick and runs 73 meters underground, penetrating 435 meters South of North-South Demarcation Line. Visitors will also have an opportunity to watch North Koreans going about their daily lives through a telescope at Dora Observatory. Travel Connections to China, Japan or Southeast Asian Countries

Please contact the IFOS Seoul 2013 Tour Agency, Grace Travel (tour@ifosseoul2013.com), if you wish to travel to China, Japan or other Southeast Asian Countries. Customized trips are available to suit your needs.
Visitors to Seoul are often struck by the city’s incredibly diverse atmosphere and multi-faceted profile. Evidence of Korea’s fabled economic development and technological initiative abounds, yet Seoul’s illustrious history, dating back to the founding of the Joseon Dynasty in 1392, has hardly been ignored. Grand imperial palaces and serene temples have been meticulously preserved amongst the towering skyscrapers and busy urban sprawl that have come to be associated with modern Seoul. Recently, the city has been making a solid push to re-establish its natural beauty and environmentally friendly side. In addition to the lush forests and mountains which encircle Seoul, successful projects to landscape and restore the Cheongyecheon (Stream) and Hangang (River) banks have provided a wonderful refuge from the pressures of urban life.

Hear now. And always.
The Cochlea & MED-EL Electrodes

The cochlea is situated in the inner ear and is approximately 7mm in diameter or the size of a pea. In the cochlea are three fluid-filled canals called the scala tympani, scala media and scala vestibuli. These canals are responsible for transmitting sound vibrations to the neural structures. It is in one of these canals that an electrode array of a cochlear implant is inserted. However, it has been established that the scala tympani is the ideal location for an electrode array. Due to their design, MED-EL electrodes are perfectly suited for insertion into the scala tympani. Once in the scala tympani, it is also important that the electrode array does not perforate the wall of a neighbouring canal thereby destroying membranes and neural structures.

MED-EL electrodes have been specifically engineered to protect the neural structures of the cochlea. Due to their ultra-soft and flexible design the electrodes allow for gentle insertion causing minimal friction and optimal placement in the scala tympani.
