Often times, Wireless service and neutral host providers are faced with the challenge of deploying and operating indoor and outdoor DAS networks to enhance their end-user's experience by providing better coverage and higher band-width all while maintaining the reliability and up time expected from a conventional macro cell site; "said Adam maghrouri, President of Americas for iConnectiva."

By leveraging iConnectiva **ONEVIEW DAS Solution**, enclosures and services currently utilized in networks throughout the world, DAS operators are able to deploy high quality networks that meet stringent telecommunications industry standards. From a service provider perspective, this means they are able to limit customer churn by providing a high-quality end-user experience. From a neutral hostprovider perspective, this means they are able to win and support clients by offering reliable infrastructures with superior performance plus High-efficiency rectifiers to minimize operational costs.

**ONEVIEW DAS Solution** can be deployed in extremely different conditions, from an environmentally controlled office building with limited security concerns, to a light or telephone pole in a dense urban setting where required environmental control and security are paramount. Regardless of the situation, reliable infrastructure solutions are to assure worry-free operation; "continued Adam Maghrouri."

iConnectiva provides our customers unmatched visibility and control of their infrastructure from afar and at the site – increasing reliability and decreasing operational costs; "Said Maghrouri."

#### **About iConnectiva:**

iConnectiva is an Analytics Solutions, OSS/BSS & Infrastructure Solutions provider with vast experience in a wide variety of Telecommunications, Financial, Enterprise environments.

The Miami Herald Print Edition app - another way to access the digital newspaper on your iPad.
