Our Heavy Duty Unisex Long Lab Coat features an exterior fluid barrier that repels splashes and stains, embedded antimicrobial agents to prevent microbial growth on the fabric, plus a moisture-wicking interior to keep you dry. Made from VESTEX, the only fabric Proven<sup>1</sup> in a hospital setting to inhibit bacterial growth on the fabric, the myGuardian long lab coat is comfortable and breathable with a roomy fit, unisex styling, notched lapel, long sleeves, and our StayPro Finish for an all-day crisp and professional look. The fluid repellent and antimicrobial technology is permanently bonded right to the lab coat fabric, so these essential barriers never wash out, while stains launder easily. From the moment you open the package you'll feel the durability, protection, and quality of our fabric: a crispness that softens, yet still completely protects, after just half a dozen washings. This heavy duty unisex long lab coat also offers two hip pockets and one chest pocket.
