Evans

Open:

Good Evening Drake University and Des Moines, Chris back again with you here through the seven o'clock hour.

I've got some great music for you along with the hour's top stories plus the latest news for all you...so sit back and relax

Up first is _____ by
_____ right here on 94-1 the DOG.

News :

Weather:

Time now for a look at 94-1 The Dog Weather:

Friday will be _____ with a

high of _____. And for the

Weekend Saturday we'll see

_____ with a high of

_____ and Sunday

_____ with a high of

_____.

Now back to the music right here on 94-1 The

Dog.

Time now for a look at what is happening
around campus:

October 15-th will be character counts day
at blank park zoo. This family-fun event,
will be held from 1 to 4 p.m.

"A Little Salsa on the Prairie: The Changing
Character of Perry, Iowa," a documentary
that chronicles culture change in Perry was
co-produced by Jody Swilky an English
Professor here at Drake. The film will
premier at the Serria Theater in West Des
Moines Sunday October 22nd.

Time now for a look at technology news:

Higher speed internet access could be around the corner in the US. According to an article on C-N-N dot-com a group of European telecom companies are trying to add more speed to their lines by using the current copper wires that are in homes now rather than switch to fiber optics. The program is still under development however so no date has been slated for its release.

And finally Remember the movie contact? You know the one with Jodie Foster where she goes in search of extra terrestrial signals? Well listen up all you SETI enthousiats. Yahoo is taking up what it calls the Time Capsule project where people can send text, images, whatever into space via a laser.

But you better act fast as the project
begins and well ends on Oct. 25th.
