The Torrey Point Group Announces the Expansion of a Global Project Team and System

New York, NY, August 25, 2008 – Torrey Point Media - Torrey Point Group, LLC, a leader in Network Architecture Design Services for large enterprise, federal government and service providers announced today the hiring of Kevin Volk to run it's Global Project Management Team. Kevin will head the team and will report directly to the Board of Directors while working as a separate division within Torrey Point to ensure department organization and compliance on projects. Kevin comes from EMC (NYSE) where he served for several years as a senior project manager on specific high-profile enterprise and service provider accounts in the East Coast. Kevin brings several innovative systems that will enable Torrey Point to build a web-based project management solution for managing its new projects and a comprehensive Q&R program for it's customers loyalty development globally. The new system will help Torrey Point manage each projects unique and complex schedules, milestones, teams and documents in a more cost-effective and streamlined way. It will also provide Torrey Point management teams with real-time visibility into each project -- as well as insight across the entire project portfolio.

"We chose Kevin for his expertise and proven track record in our industry along with his reputation for delivering high-quality, rapidly-implemented solutions. We are convinced Kevin will take time and cost out of all phases of our projects", said Steve Fazio, CEO for Torrey Point Group. Fazio expects the system will allow improved communication and collaboration between Torrey Point Group headquarters, remote offices and field teams.

Kevin Volk a native of Buffalo, NY will be based out of the New York Office and believes his decision to join Torrey Point Group made a lot sense, "I looked around at a lot of businesses and the more time I spent evaluating Torrey Point the more I experienced them as a market leader in high-end networking architecture, had major contracts with Fortune 100 and Federal Accounts plus some of the most respected engineering resources in the Networking Market. It was a no brainer".

About Torrey Point:

Torrey Point Group, LLC is a leading IP and MPLS network architecture consultancy serving Fortune 500 customers on design and implementation projects for their next generation networks. The company's service offerings include network and storage architecture planning, design, installation and operational application services for select enterprise, carrier and government customers. Our deep and specific knowledge of Data Center, IP edge and IP/MPLS-enabled, EIGRP and OSPF core networking and security services allow us to build secure, scalable and intuitive networks that set us apart from the competition.
