To Whom it May Concern:

This is a letter of recommendation concerning my colleague, Shawn Allen. We had the opportunity to work together at Bent Tree Press where I served as the production liaison and desktop publisher/designer for authors that he signed from 2006-2009 in a variety of academic disciplines.

Shawn's attention to detail and process for managing both author expectations and the timeline for submission was exceptional. He always took a personal interest in my production and design process and was able to coordinate projects effectively to ensure on time delivery. I consider his project management skills to be exceptional and I would highly recommend him for any position that puts him in front of customers or authors.

Shawn and I faced several challenging projects that involved comprehensive design elements as well as numerous artwork or scientific illustrations to be created, so I consider him to be someone who can manage highly complex projects effectively.

If I can provide further details concerning Shawn please contact me at 612-581-3731 or via email at [jwreisner@msn.com](mailto:jwreisner@msn.com).
