

If you're trading OTC derivatives, you need a safety net.

Reduce your risk by managing trades and contracts with xPressDerivatives™, an EMC® Document Sciences® solution. xPressDerivatives automates and supports the creation, negotiation, and approval of all types of contracts and negotiated agreements including prime brokerage agreements, margin agreements, ISDA master agreements, CSAs, and confirms. By adding structure to the contracts process, xPressDerivatives ensures that financial agreements comply with regulations—helping you manage your exposure more effectively.
