

[3] Project Room  
Isometric

1. The pivot door articulates by pivot hardware located at top and bottom of door. Door swing orientation is reversible.
2. Door slivers are a companion to the door packages. In the glazed version, light projects into the space. Solid slivers can house switches, thermostats and/or fire detection devices.
3. The whiteboard smart fascia integrates into working wall elevations. It supplies an erasable surface that is appropriate for demonstrating quick concepts.
4. A 3" Shelf placed beneath the whiteboard smart fascia provides a surface for holding markers and brushes or resting light objects.
5. The tackable smart fascia is a tackable surface that accommodates the visual display of paper-based information. It is available in all Teknion panel fabrics.
6. Altos accommodates face-mounted power and communications access at three levels including base height.
7. Clerestory glazing delivers light into the space while retaining visual and acoustic privacy.
8. Highly adaptable Ability™ mobile tables and storage meet constantly changing needs.
9. Dharma™ is appropriate in multi-functional and contemporary spaces.
