

## *You've Seen 4 Doctors, Had 13 Treatments and STILL Have Serious Neck or Back Pain*

Are you tired of chronic neck or back pain? Leg pain? Stenosis?  
Difficulty walking? Numbness? Failed surgery?

The team of Dr. David Armstrong and Dr. Phuc Armstrong (Leawood, Kan.) is caring for patients with a revolutionary new treatment that's effectively helping chronic neck, back and leg pain sufferers WITHOUT drugs or surgery. The treatment: Non-Surgical Spinal Decompression. This treatment has proven to help 86% of chronic pain sufferers.

Drs. Armstrong have seen many patients come to their office in agonizing pain. Within a few weeks, they're better than ever. The reason: The recent development of a new procedure called *spinal decompression*, which helps these problems without surgery.

Basically, spinal decompression is a gentler and more advanced form of distraction that may reduce disc pressure allowing necessary nutrients to initiate and accelerate disc healing.

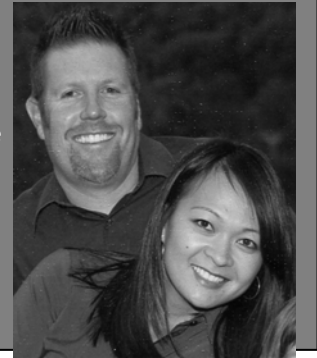

Using computerized equipment to create this distraction and relaxation, the success rate is very high, and patients experience no pain during the therapy. In fact, some patients fall asleep during the procedure because they find it so relaxing. Using a combination of spinal decompression and other rehab therapies, most patients are back to normal in just a few weeks.

*Allow  
Dr. David Armstrong and  
Dr. Phuc Armstrong to  
help you.*

*I hurt my lower back a month ago and could hardly get up from a sitting position. I started going to Dr. Dave two weeks ago, and now I am almost pain-free and my mobility is much better after receiving decompression treatments.—Corene*

*I went to my medical doctor for low back pain and knee swelling. He told me the only thing I could do to correct the problem was to ice it and take Aleve. So I decided to come to Dr. Dave and, after one week of decompression, my low back pain was extremely better and my knee swelling was completely gone. I would recommend decompression with Dr. Dave to anyone with back pain.—Linda*

*I recommend decompression with Dr. Dave to anyone with nerve pain. It offers immediate relief by taking pressure off of the nerve that is being squeezed by the vertebra or dislocated disc.—Margaret*

Call before **Aug. 30, 2009**, and Drs. Armstrong will provide you with a full exam for **only \$37**. They will discuss your problems, take any necessary X-rays, examine you thoroughly and provide you with a detailed report on the cause of your problem. *Other doctors charge much as \$270 for the same exam.* You won't be obligated for

any further care. You'll simply learn whether spinal decompression can help you. If you decide to follow through with Drs. Armstrong for further care, you'll be told how long it will take to relieve your problem and how much it will cost.

Call now: 913-341-DISK (3475) for an appointment. Sooner than you think, you can be enjoying a healthy life without pain.
