

April 7, 2011

To whom it may concern:

I would like to write a quick letter of recommendation for Natalie Pike. She has served as a Lifeguard with us for over 3 years and for the last year she has held the position of Head Lifeguard. Over this period of time, Natalie has met and exceeded all of my expectations for the positions she has held. Natalie takes her work very seriously and has an eye for Risk Management. Her communication skills also lend to a strong rapport with the staff and our patrons as well as her supervisors.

Natalie is also a very reliable individual. She is always at least on time for every shift, if not early. I can also count on Natalie to substitute for another guard on short notice. Her reliability makes it easy for me to leave the facility in her charge. It sounds cliché, but I can sleep easier at night or in the mornings knowing that I have a capable person like Natalie here on my staff at this facility.

Risk management is key to lifeguarding and is something we hold each lifeguard to without question. Natalie always has her eyes out for problems in and around the pool area. Her awareness on the pool deck shows a maturity that sets an example for all of our staff.

Natalie has always shown great initiative in the way she performs her job. She is always striving to improve her leadership abilities as a head lifeguard and puts in the extra effort. Her work ethic and desire to succeed are unmatched in the working environment.

In closing, it is my pleasure to recommend Natalie Pike. She will give the same exceptional work effort in any position as she does here. I would expect nothing less from her professionally. She has continually strived to provide the best effort possible in her job responsibilities here at the aquatic center. Any organization would be very fortunate to have a professional on their staff who is as reliable, mature and devoted as Natalie.

Sincerely,

Chris Crume
