July 9, 2011

To whom it may concern:

My interaction with Erica Wodzak has been through her studies at the University of British Columbia (UBC). I have known Erica for approximately 1 year. I first got to know Erica as a student in my Marketing Research course.

In my Marketing Research course, Erica's performance was excellent. She took her studies seriously and was well prepared for class discussion, exams, and for various projects and assignments. Her dedication to the class was apparent – she consistently added to the learning environment. Subsequent to this class I also had the opportunity to supervise Erica in a group consulting project. Her team worked to provide counsel to a nonprofit organization here in Vancouver. The performance of the team was excellent and I was impressed by what the group accomplished.

I would note that I am familiar with Erica's activities beyond her studies at Sauder. She has a strong background in biomedical/mechanical engineering. Her completion of a degree in applied science and specific work experience in this area (e.g., Ontario Power, IAEA) point to the skills developed. Further, Erica has been involved in a number of volunteer and recreation activities outside of her studies. She has been impressive in her ability to balance her activities and interests.

I highly recommend Erica for employment opportunities. She is hard working, dependable, and a good communicator. I would be happy to provide further details regarding Erica and her capabilities if needed. I can be contacted at (604) 822-8346 or darren.dahl@sauder.ubc.ca.

Sincerely,

Darren W. Dahl
