

SYED IKRAM ALI

SYED.IKRAMALI@GMAIL.COM
0313 9592787
HOUSE NO 834 I-10/1 ISLAMABAD

Objective

To obtain a position as Software Developer in a highly reputed organization.

Summary

- More than one year of experience in developing applications using C# and ASP.Net
- Proficient in Web Services, SOAP, XML, XSL, CSS, HTML, AJAX and JavaScript
- Worked extensively with Data Adapter, Dataset, Data reader as a part of ADO.NET and LINQ
- Used N-tier architecture for presentation, Business and Data Access Layers
- Developed and consumed WCF services in ASP.net application
- Extensive experience in SQL Server Database design, MySQL, Database maintenance, developing T-SQL queries, stored procedures, and triggers using SQL Server 2008
- Worked with Object oriented databases like Db4o
- In-depth knowledge of cutting edge Technology Cloud computing ,Window Azure, Android OS and IPTV
- CCNA certified from Mid Sweden University

Skills

- Asp.Net ,C#, IIS, XML, XSLT, CSS, HTML, JavaScript, AJAX, SQL Server ,Db4o

Education

MS Computer Engineering 2011
Mid Sweden University Sweden

Master of Computer Science 2007
International Islamic University, Islamabad, Pakistan

Experience

Master Thesis : Real-Time Remote Sensor Monitoring for the ServaNet infrastructure

Environment: Db4o, MySQL,WCF, Asp.Net with C# ,JavaScript.

A web based monitoring system has been developed that monitors critical environmental conditions such as the temperature and humidity of the ServaNet network locations. The system reads the sensor values of different sensors located at multiple locations through a window communication foundation service and aggregates their values in a central database. If some threshold value is reached or a critical status is detected then the system will notify the user by means of a warning message thus enabling appropriate action to be taken. The user can also query the real-time or historical values for the sensors with regards to each remote location on a web browser.

Dot Net developer Interne

December 2010 – March 2011

Barpal.se , Arokan Science Park Sundsvall, Sweden

Worked as a team member of Barpal. Barpal is a Swedish project which integrates all the events of different bars which are located at multiple cities in Sweden into a single portal to build a unified experience. Worked on user interface with AJAX and developed cascading style sheet uniformly throughout the application. Designed and reviewed the database, wrote store procedure for Mobile APPs.

Junior Dot Net developer

Jan 2007 – Aug 2008

Insignature (Pvt) Ltd , G-11/1 Islamabad

Developed Online salary system for the ZTE employees where each employee can login to their account and can view their salary status. The application has been developed in three tier architecture. Worked extensively with Master Pages, Grid view, Repeater controls and Data List Controls. Created stored procedures and views using SQL Server 2005.

COURSE PROJECTS

SCTP Java APIs ImplementationEnvironment: Java, SCTP Kernel, Linux, Net Beans 6.5

The “SCTP Java APIs implantation” is a research oriented project in which the Java APIs for SCTP were implemented in order to test the performance of this new transport layer protocol

Order Management SystemEnvironment: Java ,BPEL,XML

It is the practical implementation of Service oriented architecture course .It is an Ecommerce type application, in this application three web services each with a different task has been created in Java. All these web services are then orchestrated into a single service using Business Process execution language (BPEL) to perform collectively a single task regarding order management system

Online ShopEnvironment,; Asp.Net ,C#, JavaScript ,Visual Studio 2008,ADO.NET,SQL Server 2008

Designed and developed an ecommerce application where the users can buy different electronic devices online. Amazon web services have been consumed in this application.
