To Whom It May Concern;

This is a letter of recommendation for Erin Brennan. I have known Erin for 15 years. As she was growing up, she was always involved with children. She was an outstanding student and began working with children at camps and field trips after high school. Erin became a classroom teacher last year at Moore Traditional School.

I have enjoyed working with Erin and have observed her teaching many times. She is very comfortable in the classroom and builds rapport with her very diverse student population. She sets high expectations for her students and has dedicated herself to their growth. She plans effective lessons and follows through with strategies that differentiate her instruction. Erin also works with students outside the classroom as an Outdoor Club sponsor. Students learn real life connections to their studies in Science from their nature studies and development of a nature trail at school.

Ms. Brennan has exceptional knowledge of her science content. She participates in professional development and reflects on her teaching in order to continue to grow as a teacher. She is well respected as a colleague and collaborates effectively with others. I believe that Erin will be an excellent Master Teacher as she continues to grow and develop.

Sincerely,

Debi Sanning
