

3E Mobile-MSDS: Instant Access to Chemical Inventory and MSDSs, Anytime and Anywhere!

Thank you for attending 3E Company's web seminar, "3E Mobile-MSDS: Instant Access to Chemical Inventory and MSDSs, Anytime and Anywhere". If you would like to refer to the presentation or share it with a colleague you may access the presentation [here](#) and the audio recording [here](#).

3E Company's database of 4.5 million MSDSs is now available for viewing in the palm of a user's hand, saving valuable time and helping bolster EH&S regulatory compliance efforts by ensuring reliable access to critical product safety data and information.

Critical Data is Now Available in Remote Locations and Rugged Environments for:

- Companies with employees that travel or work remotely or in rugged environments
- Spill or emergency situations
- Locations where computers are not easily accessible
- The Utility, Construction, Transportation and Manufacturing industries

MSDS access can be difficult and often times painfully time-consuming. With the introduction of 3E Mobile-MSDS, 3E has simplified the MSDS management process by allowing users to access their MSDSs from their smartphone – whether they are in the field, on the floor, or traveling. For more information click [here](#).

3E Mobile-MSDS Features and Benefits

3E Mobile-MSDS Data

MSDS, Ingredients, Physical Properties, Classification (NFPA, HMIS, WHMIS, EU, GHS), and Green Scores.

UPC and Barcode Scanning

Seamless access to inventory and retrieval of relevant MSDSs and related information on smartphones by UPC and barcode scanning.

3E Mobile-MSDS is FREE

Available absolutely free to all 3E Online – MSDS customers who use iPhone®, Blackberry®, Android™, and other devices.

Anytime, Anywhere Access

Enables employee access to MSDS and related information from the field. Supports MSDS data access at the scene of incidents or spills.

Choosing the right EH&S information provider is a critical step in this dynamic global environment. Solution providers should have global scale, solution depth and breadth, a reputation for quality, and commitment to ongoing investments in product development to meet ever-changing needs.
