

Student Accolades from Online English 102 Course Fall 2012

1. ...I do enjoy this class. I respect you as a teacher because you have put everything we need out on blackboard. I can probably go as far as saying that you set this up perfectly so that all your students have what they need to succeed in this class. This is definitely the best online class I have taken. So far, I'm enjoying your class. I find the discussion board very interesting. I like hearing so many different opinions whether I agree with them or not. The encouragement and constructive criticism that I receive from you about my writing is very helpful and insightful. I tried to find something to complain about in the course but, I can't. ... Thank you for guidance and productivity. Job well done. On top of everything, I am really grateful for all your positive feedback. It got me through quite a few insecure moments and encouraged me to continue to work hard!

2. As a professor, I believe you are very understanding. It seems you are willing to work with your students and determined to help us succeed. I like that you give us time to complete essay and drafts and that you are not piling tons of work on us like some online classes. You give prompt and adequate feedback and you are full of honesty. You are truly dedicated to you student and available by email for anything. I know I haven't communicated much with you for help only because I think I need more face to face help. But I also think for the second half of the semester I will communicate more with you to get the help that I need if that is ok.

3. I have no complaints in regards to your teaching methods, and find that you are friendly and easy to correspond with, unlike many other professors. In fact, you are extremely helpful! In a perfect world, I could push a button and get a response from you on-demand, but short of that unlikely scenario, this class has so far been everything I had hoped it would be. ... I am enjoying this course! I think you are actively involved in this course. May sound funny but I have another professor who grades assignments and we don't have any further communication with her. You send emails, you encourage me every time you send an email out about our new week and hope everyone enjoys the week. I feel truly encouraged to not give up. When you sent the email with the link to YouTube and said you send it to all of your students during midterms, I seen it and I instantly had a smile on my face. I showed my children and they enjoyed it also. Keep up the wonderful work, your profession is truly in your heart and I can feel it. Thank you for all you do.
