

BoldGenius

Learning Management System

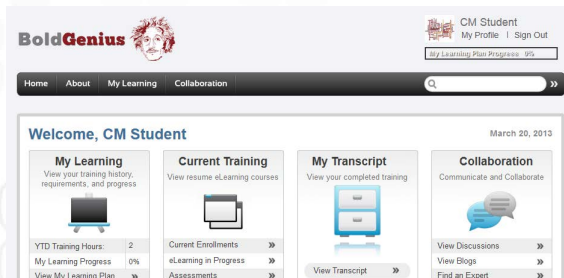

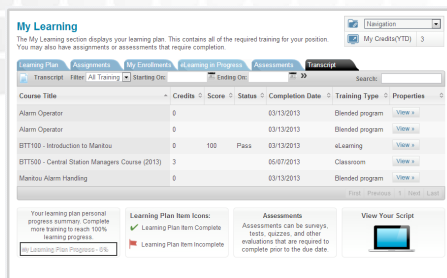

BoldGenius is a Learning Management System (LMS) that was developed to provide self-directed, web-based learning to your new and existing staff.

BoldGenius has been reviewed by several customers and comments include-

"The courses are useful for learning new aspects of Manitou and for refreshing known or previously studied material."

"As much as I hate tests, the tests were good. They were properly crafted, so if I needed to, I could go back into the lesson to get the right answer if my answer was wrong."

The online courses available in BoldGenius are grouped into Learning Plans which can be assigned to individual users. BoldGenius includes an evaluation at the completion of each Learning Plan and is the perfect solution to ensure your staff is trained as thoroughly as possible, and that their skills are kept up to date.

BoldGenius currently offers the Alarm Handling Learning Plan with the following courses:

- Intro to Manitou
- Alarm Queue
- Alarm Form
- Handling Alarms
- Alarm Handling Actions

Learning Plans for future release include: Data Entry, ManitouLite, Manitou Basics, Workflow Basics, and BoldNet.

BENEFITS AND KEY FEATURES

- Flexible and low-cost training
- Self-paced training program
- Learning plans designed for different Manitou users
- Assessments to gauge understanding and progress
- Users can revisit learning plans for an entire year
- Expand offerings to current customers

Technical Requirements

- Current Web Browser
