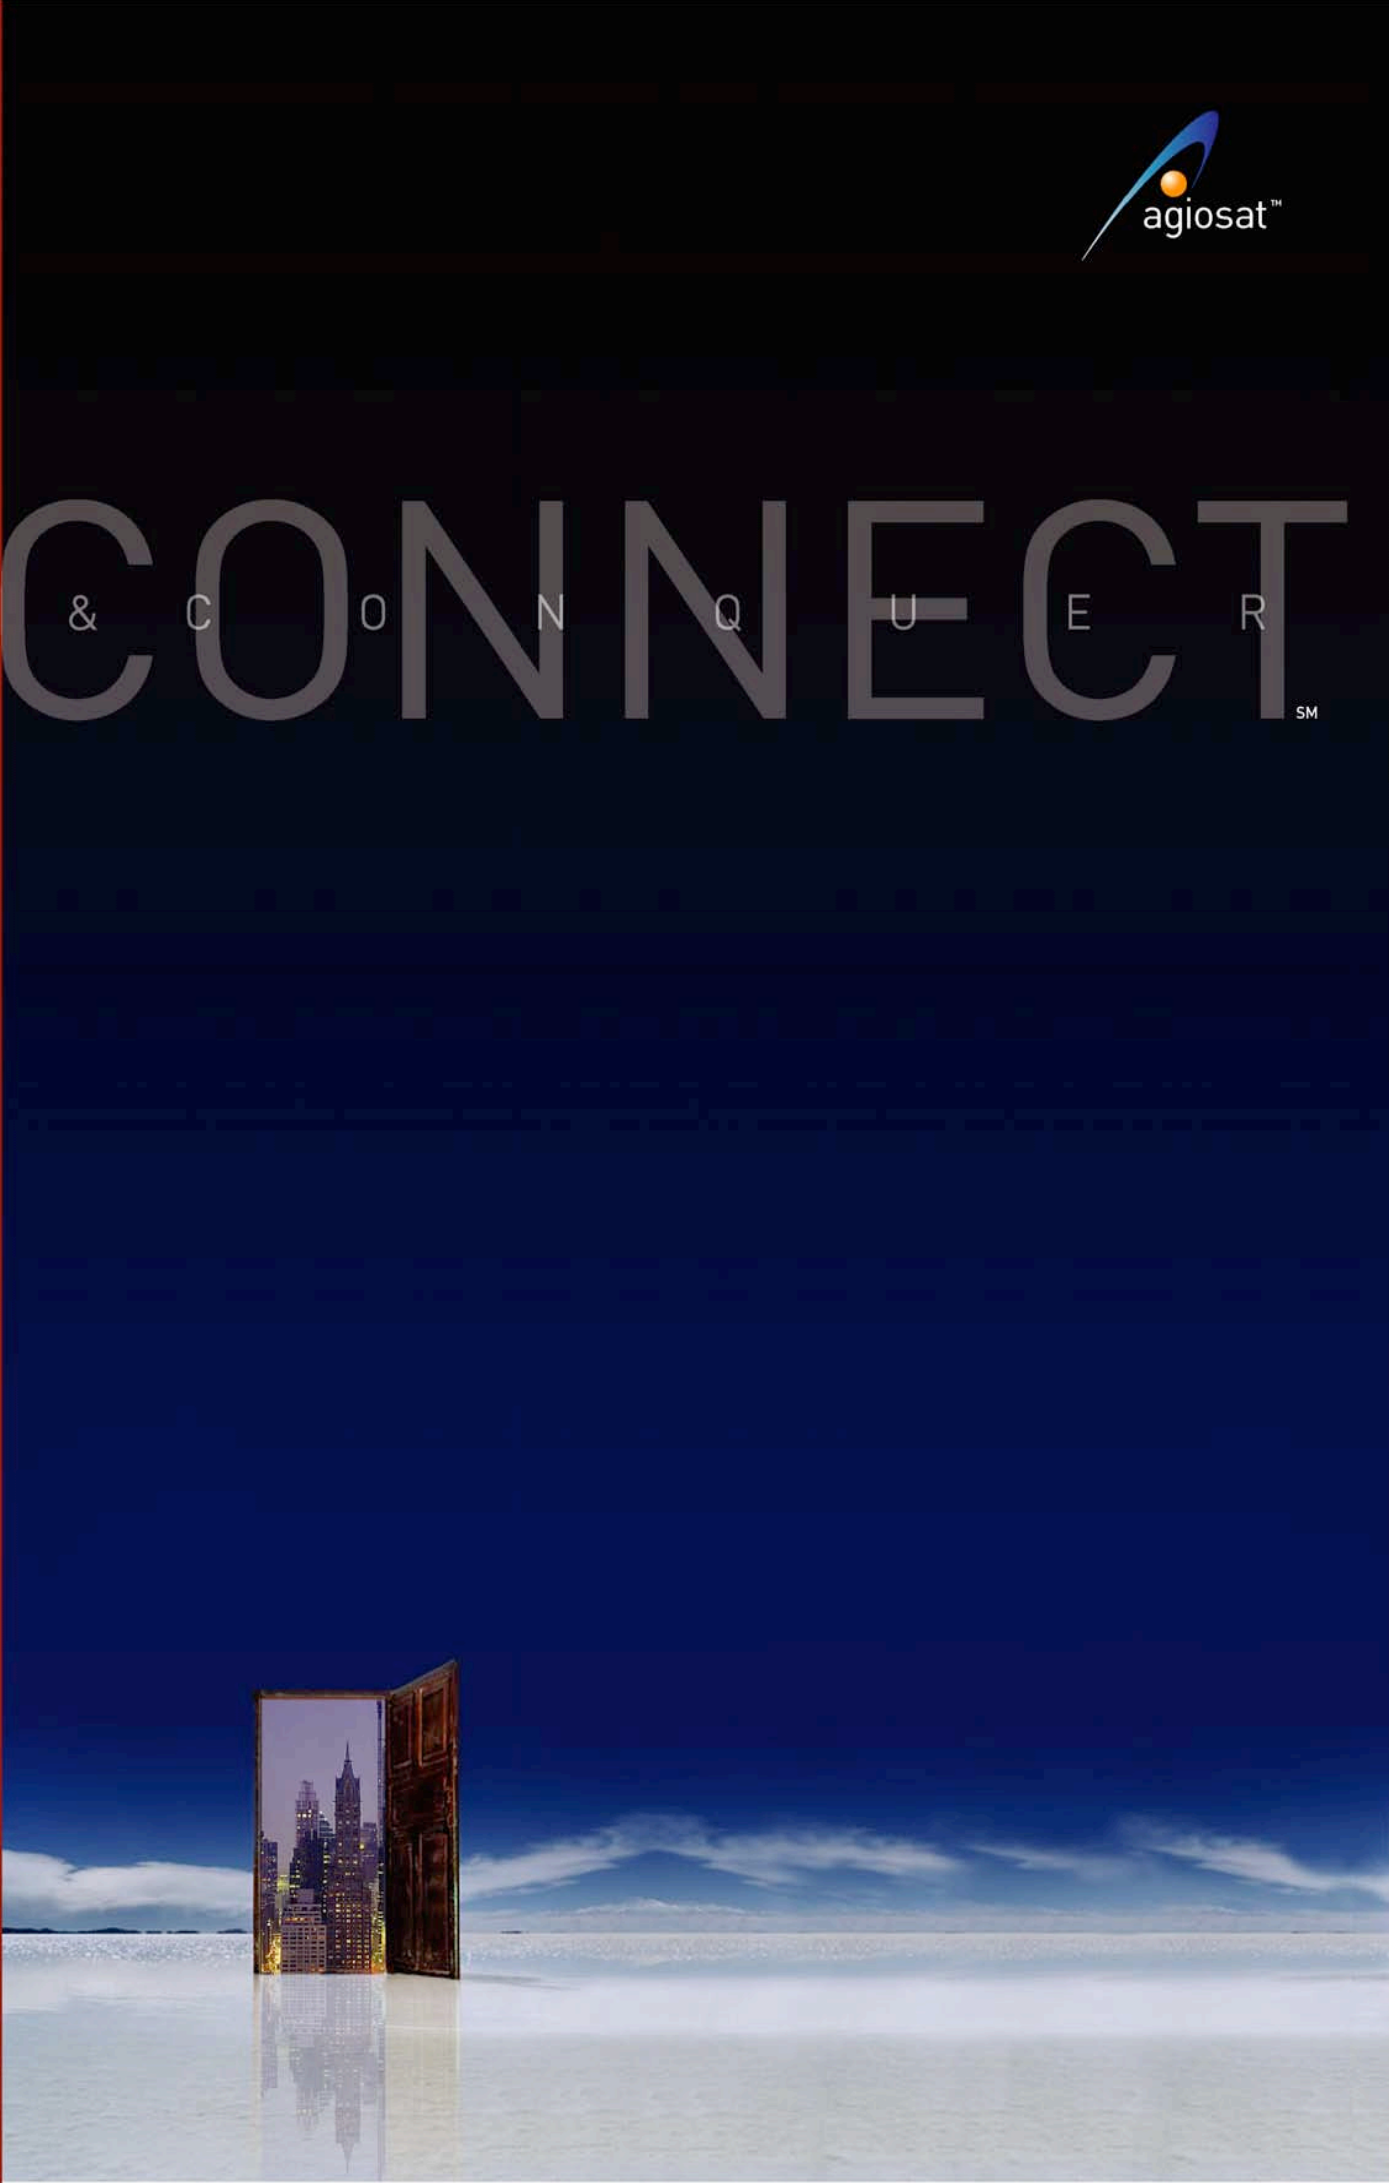
CONNECT & CONQUER℠



REACT
RESPOND
RECOVER

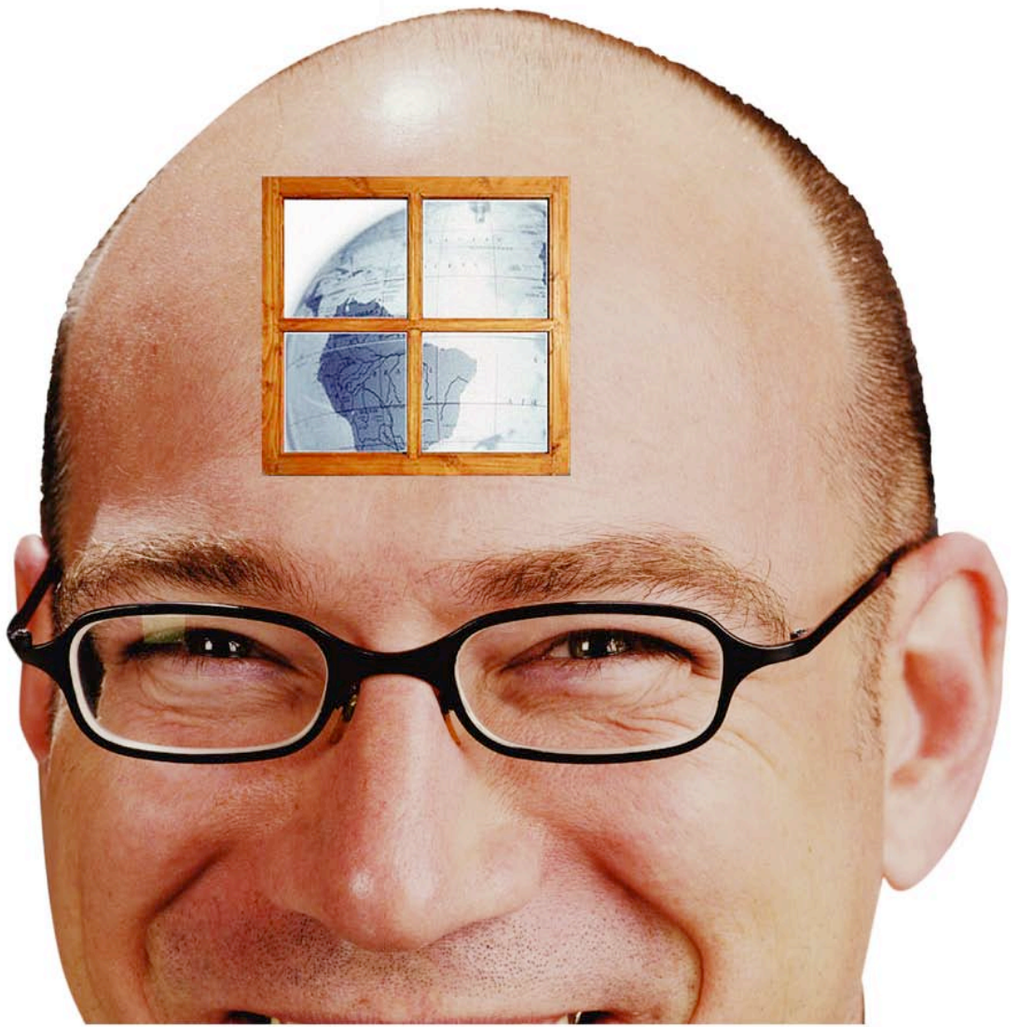
Agiosat Global Communications is uniquely equipped to meet your challenges.

relax

Unconditional connectivity

It begins with a burning
desire to be more effective,
to gain more efficiencies,
to leverage each and
every global connectivity
innovation possible.
Our thoughts precisely.

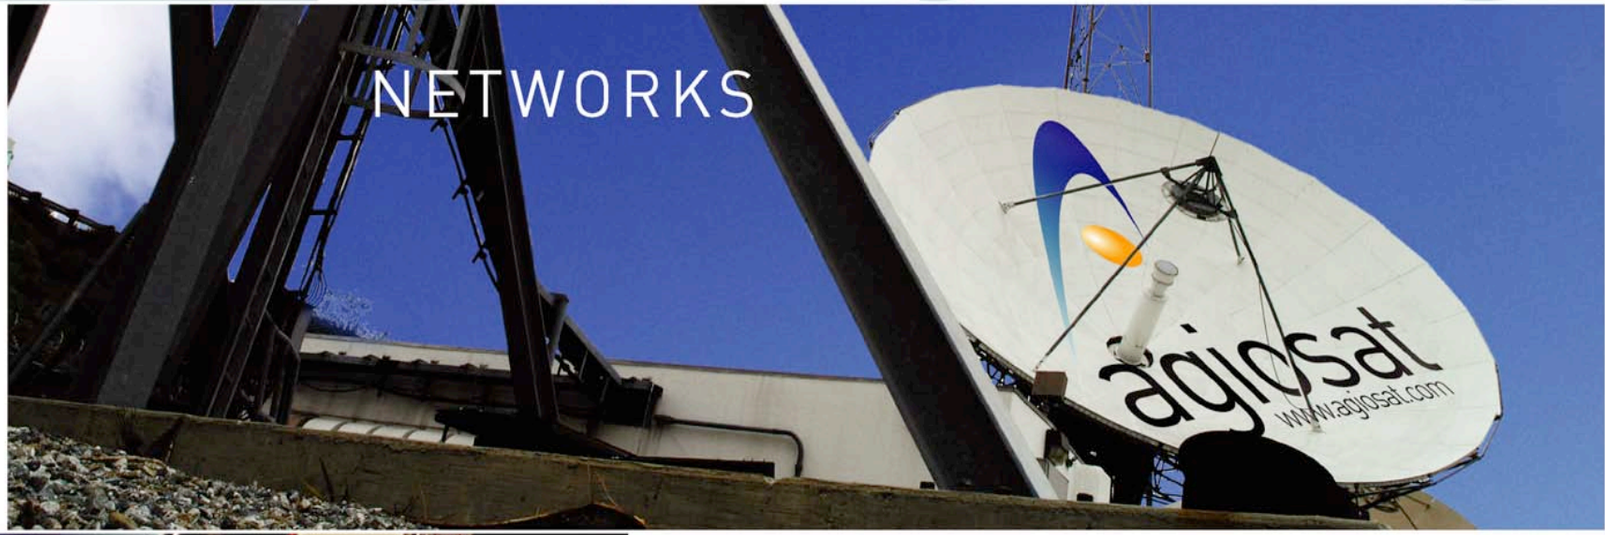
Agiosat is dedicated to meeting the connectivity needs of an increasingly competitive, demanding, complex and volatile world. We achieve this by keeping it simple for you. Agiosat provides cutting-edge, satellite-based, communication and network technologies, with global reach. These solutions are delivered by a team with an unparalleled expertise in turn-key, satellite-based connectivity. Agiosat Global Communications is where immediate need meets immediate – and skillful – execution.



THE POWER of one

The multiple benefits of a single point of contact. Commonly, the promise of connectivity becomes the guaranty of complexity. Sourcing, orchestration and ongoing management of multiple providers used to be the reality. That is, until Agiosat.

NETWORKS



Global reach paired with local support. Welcome to the Agiosat Global Satellite Network.

Our global satellite networks are connected to the terrestrial voice, data and video grid through a series of U.S.-based earth stations owned and operated or managed by Agiosat. This provides you with unparalleled flexibility, efficiency, accountability – and most importantly – reliability.

Agiosat leverages the most advanced satellite networks and technology on a global basis.

MOBILITY & CONNECTIVITY

The need to connect happens anywhere and at anytime. Fortunately, we're already there.

The Agiosat Responder Communications System for First Responders.

Response and recovery communications systems. Agiosat supports governments and industries with robust and scalable satellite communication backbones and state-of-the-art vehicular, portable and flyaway connectivity solutions. Instant infrastructure – anywhere, anytime – is now a reality.

TECHNOLOGY APPLICATIONS

Yours is a unique world. We have the solutions to make it available anywhere on the planet.

Customer-specific communications services and solutions. From maritime to military, from exploration to enterprise, Agiosat combines commercial off-the-shelf products with our reliable global network. The result – a broad array of purpose-built connectivity innovations.

A recent technology innovation, the regional BGAN System is a cost-effective, always-on, IP satellite connection on a laptop-size terminal.

CUSTOM SOLUTIONS for a custom world

At Agiosat, we thrive on answering unique challenges. It's how we leverage our value into your enterprise.

From assessment to deployment. The word "partnership" is given more than lip service at Agiosat. We're committed to 100% customer satisfaction for every aspect of the solutions we bring to the table.

The experience to see the world from your perspective. We recognize the need to know the reality of your environment. It's how we've built – and will continue to grow – our value.

Our promise of continuous support and innovation. Agiosat's support programs bring together the best of proactive and reactive disciplines. It's a commitment to always improve your efficiencies.

We welcome the opportunity to prove how Agiosat will help you reach your connectivity potential.

Your critical path begins with this simple first step. We strive to make the best use of your time. Our needs evaluation process is simple, straight-forward and illuminating.
