

BGAN BROADCAST

broadcastmedia
Transforming satellite news gathering

BGAN is the only mobile satellite service to offer broadband data – up to 492kbps – with simultaneous voice, through a single, truly portable device on a global basis. It is also the first service to offer guaranteed data rates on demand – up to 256kbps – for live video broadcast.

Agiosat's Broadband Global Area Network service – BGAN – is transforming satellite news gathering with a compelling combination: smaller, higher bandwidth terminals that can be rapidly deployed all over the world and easily used by non-technical staff. So, wherever the story breaks next, make sure BGAN is at your side.

Applications

- Live video and audio broadcast
- Store and forward
- Broadband mobile office: email, Internet, VPN, telephone
- Remote bureau: supporting multiple users from a single device

In-field equipment

- BGAN satellite terminal
- Handheld video camera
- BGAN voice handset
- Power adapters AC/DC, batteries, cables
- Laptop (MAC or PC) with software for video/audio encoding

BGAN broadcast

Live Video

Key benefits

Simultaneous voice and broadband data

- Significantly improved picture quality from a single, highly portable device
- Send reports more quickly in dangerous situations
- Reporter can speak to the studio while making a live video broadcast
- Separate voice channel means data performance is not affected

Highly portable

- Easily carried in a backpack – the highest bandwidth terminal only weighs 2.8 kilos
- Ideal for rapid deployment
- Doesn't draw attention to media presence in dangerous situations

Global coverage

- Wherever you are on the planet, you can access the BGAN service
- Deploy same device worldwide to all mobile news gathering teams

Flexible

- BGAN supports both ISDN and IP – compatible with legacy news gathering applications while providing a smooth upgrade path to IP

Easy to use

- Quick to set up and shut down
- No technical expertise required – reduce size of reporting teams and costs
- Reliable
- Send high quality video back to the studio – on time, every time
- Network capacity can be dynamically re-directed to areas of high usage
- Ensures bandwidth availability is maintained when a major news story breaks
- Range of highly robust satellite terminals to withstand challenging environments and climatic extremes
- Competitively priced
- Significantly lower costs for both terminals and airtime compared with previous generations of mobile satellite services
- Can deploy to more reporting teams
- Live news coverage from more locations, increasing your competitive edge
