

IF KNOWLEDGE IS POWER, **ATSI** IS YOUR INNOVATION ENGINE

“Information is not Knowledge” – Albert Einstein

When it came to knowledge, Einstein’s innovative thinking enabled him to create some of the world’s most revolutionary concepts. At ATSI, we think your organization can innovate to transform its information into knowledge. We work hand-in-hand with your subject matter experts – turning resident information into useful, actionable knowledge that empowers your staff to shine and achieve.

Complete Client Satisfaction

“Just wanted to commend your team on how responsive they've been in dealing with the constant state of flux that we have.”

“As usual, this was an unreasonable request in an unrealistic time frame ... the team jumped in to make us all look good.”

Information Isn't Knowledge If It Can't Be Applied

After 14 years of specializing in instructional systems design, knowledge management, and web design for clients such as the U.S. Department of Defense and Federal Aviation Administration, ATSI understands that simply providing people with information isn't enough. Information must be easily accessible and in an intuitive, useful, consistent format that incorporates your organization's culture and identity in order for your staff to learn, understand, and apply it – making it *knowledge*.

Empower your staff with knowledge and there is no limit to the innovative concepts they may create for your organization.
